

**Overview
and Investment
Philosophy**

The Manager's risk-adjusted return philosophy is implemented through three key tenets:

VG1, the Company, provides investors with access to a concentrated portfolio, predominantly comprised of Long Investments and Short Positions in global listed securities; and the investment expertise of VGI Partners, the Manager.

01

Capital preservation

The Manager believes that risk comes from not properly understanding your investments and places a great deal of importance on assessing downside risk.

02

Superior long-term compound growth

The Manager believes that great businesses purchased with a 'margin of safety' held for the long term are best placed to provide superior compound returns.

03

Concentration

The Manager aims to be concentrated enough in its best ideas so as not to dilute overall returns but hold enough Long Investments in order to provide an appropriate level of diversification. The top five Long Investments typically represent 40-50% of the portfolio NAV.

Commentary

The portfolio's return (net of all fees and expenses) for the month of August was +3.6%. The portfolio's Long Investments added +4.2% to performance for the month and the Short portfolio detracted -0.6% from performance during the month.

Mastercard contributed +1.7% for the month and Amazon.com contributed +1.1%.

The portfolio has 100% Australian Dollar exposure and therefore currency fluctuations did not directly impact the return for the month.

During the month we exited our holding in Linde plc, the largest industrial gas player in the world. We believe Linde is an extremely high-quality business and we hope to have the opportunity to include it in the portfolio again in the future. The decision to exit the position was made purely on valuation grounds. Olympus, which has been a VG1 Long Investment since June, entered the Top 10 Long Investments this month.
